Executive Summary

This report presents the results of an actuarial review and analysis of the Marin County Employees' Retirement Association (MCERA, the Plan) as of June 30, 2008. Employer contribution rates for the Fiscal Year beginning July 1, 2009 have been determined based on actual demographic and asset information as of June 30, 2008.

The employer contribution rates shown in this Report are as follows:

| Valuation Date | County of Marin | Novato Fire Protection District | City of San Rafael |
|----------------|--------------------|------------------------------------|-----------------------|
| June 30, 2007 | 17.30% | 39.22% | 41.18% |
| June 30, 2008 | 15.90% | 39.06% | 39.00% |

A summary of the current status of the MCERA Plan as a whole is as follows:

| | June 30, 2007 | June 30, 2008 |
|---------------------------------|---------------|---------------|
| Plan Membership | | |
| Active | 2,767 | 2,818 |
| Inactive | 751 | 724 |
| Receiving Benefits | 2,215 | 2,294 |
| Total | 5,733 | 5,836 |
| Average Pay | \$ 70,263 | \$ 78,052 |
| Assets (\$ millions) | | |
| Market Value | \$ 1,502.0 | \$ 1,402.6 |
| Valuation Assets | \$ 1,352.0 | \$ 1,485.9 |
| Valuation Results (\$ millions) | | |
| Actuarial Accrued Liability | \$ 1,582.9 | \$1,769.6 |
| Unfunded Accrued Liability | \$ 231.0 | \$ 283.7 |
| Funding Ratio | 85.4% | 84.0% |

More detailed information on the contributions by Agency and Tier, as well as a description of the reasons for the changes in cost by plan, is shown in each of the individual plan summaries, as well as in the detailed cost calculations shown later in the report.

The main points in this Report are as follows:

• As anticipated, the overall employer contribution rates determined as part of this actuarial valuation have decreased slightly compared to the rates calculated in the prior valuation.

- There are some relatively large cost changes *within Agencies and Tier*. In most cases these are caused by a few retirements, deaths, disabilities or terminations among small member populations, producing volatility in the liabilities and cost for such valuation groups.
- In the absence of any unexpected changes, we anticipate that the level of cost determined for the June 30, 2009 valuation is expected to increase substantially due to the recent extreme losses in the investment markets.
- An experience study is currently being performed on the demographic experience from 2006 through 2008. Any modifications to the current assumptions will go into effect with the June 30, 2009 actuarial valuation.

Purpose of the Report

This Report presents the results of an actuarial review and analysis of the Marin County Employees' Retirement Association as of June 30, 2008. The purposes of this Report are:

- To review the experience of the Plan over the past year and to discuss reasons for changes in Plan cost;
- To compute the annual contribution required to fund the Plan in accordance with actuarial principles;
- To discuss other issues associated with the determination of Plan and Agency costs; and
- To present those items required for disclosure under Statement No. 25 of the Governmental Accounting Standards Board (GASB).

Organization of the Report

This Report is organized in five sections:

- This Summary presents the conclusions of the Report and discusses the reasons for changes since the last valuation.
- Section 1 below contains an outline of the Plan provisions on which our calculations are based and a summary of the actuarial assumptions used to compute liabilities and costs. A glossary of actuarial terms is also included.
- Section 2 presents information concerning Plan assets, including balance sheets and income statements from July 1, 2007 to June 30, 2008. The actuarial value of Plan assets is also computed in this Section.
- Section 3 contains the calculation of actuarial liabilities and the employer contribution rate, as well as the actuarial balance sheet and development of gain and loss.
- Section 4 contains pension plan information required under Statement No. 25 of the Governmental Accounting Standards Board.
- Section 5 contains statistical data concerning Plan participants.

Summary of Results (County of Marin)

A summary of the current status of the County and Special Districts portion of the MCERA Plan is as follows:

| | June 30, 2007 | June 30, 2008 | |
|------------------------------------|---------------|---------------|--|
| Plan Membership | | | |
| Active | 2,280 | 2,329 | |
| Inactive | 562 | 540 | |
| Receiving Benefits | 1,762 | 1,816 | |
| Total | 4,604 | 4,685 | |
| Average Pay | \$ 71,612 | \$ 76,485 | |
| Assets (\$ millions) | | | |
| Market Value | \$ 1,126.1 | \$ 1,048.8 | |
| Valuation Assets | \$ 1,013.5 | \$ 1,111.1 | |
| Valuation Results (\$ millions) | | | |
| Actuarial Accrued Liability | \$ 1,141.7 | \$ 1,280.2 | |
| Unfunded Accrued Liability | \$ 128.2 | \$ 169.1 | |
| Funding Ratio | 88.8% | 86.8% | |
| Employer Normal Cost Rate | 11.09% | 8.30% | |
| Amortization of Unfunded Liability | 6.21% | 7.60% | |
| Employer Contribution Rate | 17.30% | 15.90% | |

Change in Plan Cost from June 30, 2007 to June 30, 2008

The employer contribution rate determined based on actual demographic and asset information has dropped by 1.40% of active member payroll. The actuarial assumptions and benefit provisions of the Plan remained unchanged from the prior valuation. The narrative and table below summarize the impact of actuarial experience and other changes on Plan cost.

• There were a number of changes made to the actuarial methodology and software.

First, we made a slight adjustment to the methodology for computing the Entry Age Normal Cost. Under the new methodology, the costs are computed as a level percentage of pay for each individual benefit type (retirement, disability, etc.), rather than for all benefits as a whole. This method tends to be slightly more conservative, in the sense that it generally assigns a higher portion of the total cost to prior service, thus resulting in a lower normal cost, higher accrued liability, and a lower funding ratio.

However, assigning a greater portion of the cost to past service allows for more flexibility in the funding decisions – as the Board has ultimate control over how unfunded prior service liabilities are paid off through the amortization policy. We propose to use this methodology to produce valuation results in the future, both for the funding management reasons indicated above, and because of the sophisticated projection and simulation tools it offers.

We also made a change to the way benefits are valued for retirees who have elected the unmodified optional benefit form. Previously, members electing the unmodified form with a listed beneficiary were assumed to receive a 60% Joint and Survivor annuity. For the current valuation, we received data indicating whether the beneficiary is a spouse or domestic partner, and have thus limited the survivor benefit to those with a qualified spouse or partner.

| | Employer Contribution Rate (% Payroll) |
|-----------------------------------------|----------------------------------------|
| June 30, 2007 | 17.30% |
| Change in Cost Due to: | |
| Change in Software / Methods | (0.32%) |
| Demographic Experience during 2007-2008 | (0.72%) |
| Salary Experience during 2007-2008 | 0.56% |
| New Entrants to the Plan | 0.11% |
| Investment Experience during 2007-2008 | (0.86%) |
| Change in Amortization Policy | (0.17%) |
| Total Change | (1.40%) |
| Total Cost as of June 30, 2008 | 15.90% |

The net impact of these changes was a small decrease in cost (0.32% of pay).

• Demographic experience caused a decrease in the contribution rate.

Demographic experience includes rates of retirement, disability, termination, and death - as well as other factors, such as transfers, sick leave credit and COL assumptions. The demographic experience of the Plan was in close accord with the actuarial assumptions, even a little better than expected. Consequently, the net effect of demographic changes was a small decrease in cost.

• Pay increases were higher than expected.

Increases in pay among active members during 2007-2008 were above those anticipated by the actuarial assumptions. Some of the discrepancy in expected versus actual salaries is related to the fact that we are now incorporating the employee's rate of pay as of the valuation date in our

estimation of average compensation. Previously, the only salary information available was the average pay information from the MCERA benefit calculation system. The impact of the higher than expected salary increases was an actuarial loss, increasing employer contribution rate by 0.56% of payroll.

• New members entered the Plan.

Active participation in the Plan increased by about 2% from June 30, 2007 to June 30, 2008. There were approximately 180 new hires (or rehires) entering the Plan to replace departing members.

These new hires had a small impact on the cost of the plan, increasing the employer contribution rate by 0.11% of payroll.

• Investment returns produced an actuarial gain.

The investment return on the actuarial value of all Plan assets – including reserves – was about 9.8% during the Plan year ending June 30, 2008, as a result of gains during prior years – even though the return on the market value of assets was a (6.5%) loss. This actuarial return was above the 8.00% assumed return, producing an actuarial gain that decreased Plan costs by 0.86% of active member payroll.

• The amortization policy was changed for a number of the smaller Special Districts.

The amortization periods for three of the Special Districts – Marin City CSD, Mosquito Abatement and Tamalpais CSD – were reset from the existing period of ten years to the same 18 year closed period used by the rest of the County groups. The declining amortization period of these smaller groups was leading to higher contribution volatility levels, and using a single amortization period both rectifies this problem and simplifies the calculation and administration of the employers' cost. The impact of this change on the overall cost for the County and Special Districts was very small, reducing the overall contribution rate by 0.17% of pay.

The above sources of actuarial gains and losses and other changes combined to decrease Plan cost by 1.40% of payroll, as noted above.

There are a number of factors that can be expected to impact costs in the future:

- The liabilities and contribution rates determined in this Report are based on a set of actuarial assumptions. Despite the care and effort expended in determining the most accurate possible set of assumptions, the future experience of the Plan will certainly differ from what we assume. As a result, actuarial gains or losses will occur annually, and the employer contribution rate will fluctuate.
- There are investment losses that are deferred by the actuarial smoothing method and not included in the actuarial value of assets used to determine the employer contribution rate. The ratio of the actuarial value of Plan assets to the market value is nearly 106%; that means that losses of about 6% of Plan assets have yet to be recognized.

Investment losses experienced during FY 2009 will exacerbate this position. The losses realized through June 30, 2008 have been largely offset by the deferred investment gains from prior years, and thus the cost did not change significantly due to assets. The valuation as of June 30, 2009 will show large investment losses (even recognizing the impact of smoothing), and will result in a large increase in contribution rates.

 Based on the assumptions and cost method, Plan assets are currently below the target level of assets determined by the cost method; consequently, there is an unfunded actuarial accrued liability. As a result, the employer contribution consists of two components: The normal cost and the amortization of the unfunded actuarial accrued liability.

The employer normal cost of 8.65% of payroll represents the cost of the additional benefits earned each year by active Plan members. The balance of the employer contribution rate represents the amortization of the unfunded liability, which is a payment designed to bring the Plan's assets up to the target level set by the actuarial cost method.

As the unfunded actuarial accrued liability is amortized, the employer contribution rate will gradually decrease to a level near the normal cost of about 8.65% of payroll. A more detailed projection of future Plan costs and funding ratios will be provided at future Board meetings.

Summary of Results (Novato Fire Protection District)

| | June 30, 2007 | June 30, 2008 | |
|------------------------------------|---------------|---------------|--|
| Plan Membership | | | |
| Active | 85 | 87 | |
| Inactive | 16 | 17 | |
| Receiving Benefits | 83 | 84 | |
| Total | 184 | 188 | |
| Average Pay | \$ 94,228 | \$ 103,611 | |
| Assets (\$ millions) | | | |
| Market Value | \$ 114.1 | \$ 105.8 | |
| Valuation Assets | \$ 102.7 | \$ 112.1 | |
| Valuation Results (\$ millions) | | | |
| Actuarial Accrued Liability | \$ 116.0 | \$ 129.1 | |
| Unfunded Accrued Liability | \$ 13.3 | \$ 17.0 | |
| Funding Ratio | 88.5% | 86.8% | |
| Employer Normal Cost Rate | 24.87% | 22.78% | |
| Amortization of Unfunded Liability | 14.35% | 16.28% | |
| Employer Contribution Rate | 39.22% | 39.06% | |

A summary of the current status of the Novato portion of the MCERA Plan is as follows:

Change in Plan Cost from June 30, 2007 to June 30, 2008

The employer contribution rate determined based on actual demographic and asset information has decreased slightly by 0.16% of active member payroll. The actuarial assumptions and benefit provisions of the Plan remained unchanged from the prior valuation, with the exception that there is now a new Tier for Safety members hired on or after January 1, 2008. The table and narrative below summarize the impact of actuarial experience and other changes on Plan cost.

• There were a number of changes made to the actuarial methodology and software.

These methodological revisions are the same as those described above for Marin County. For Novato, the changes resulted in an increase of 1.25% in the employer contribution rate.

| | Employer Contribution Rate (% Payroll) |
|-----------------------------------------|----------------------------------------|
| June 30, 2007 | 39.22% |
| Change in Cost Due to: | |
| Change Software / Methods | 1.25% |
| Demographic Experience during 2007-2008 | (1.72%) |
| Salary Experience during 2007-2008 | 2.10% |
| New Entrants to the Plan | 0.05% |
| Investment Experience during 2007-2008 | (1.84%) |
| Total Change | (0.16%) |
| Total Cost as of June 30, 2008 | 39.06% |

• Demographic experience caused a decrease in the contribution rate.

Demographic experience includes rates of retirement, disability, termination, and death - as well as other factors, such as transfers, sick leave credit and COL assumptions. The relatively small size of the Novato group makes it more susceptible to year-to-year fluctuations from demographic experience: For example, a single early retirement can cause a noticeable increase in the employer contribution rate. In fact, the demographic experience of the Plan for the year ending June 30, 2008 was more positive than was assumed in the actuarial assumptions, causing an actuarial gain and a decrease in cost of 1.72% of payroll.

• Pay increases above those expected.

Increases in pay among active members during 2007-2008 were above those anticipated by the actuarial assumptions. Some of the discrepancy in expected versus actual salaries is related to the fact that we are now incorporating the employee's rate of pay as of the valuation date in our estimation of average compensation. Previously, the only salary information available was the average pay information from the MCERA benefit calculation system.

For returning active employees, the average salary increased by over 12% from June 30, 2007 to June 30, 2008, significantly more than anticipated. The impact of the higher than expected salaries increased the employer contribution rate by 2.10% of payroll.

• New members entered the Plan.

Active participation in the Plan increased from 85 to 87 from June 30, 2007 to June 30, 2008, and there were five new hires entering the Plan to replace departing members. New entrants had a minimal impact on cost, increasing the contribution rate by 0.05% from 2007 to 2008.

• Investment returns produced an actuarial gain.

The investment return on the actuarial value of all Plan assets – including reserves – was about 9.8% during the Plan year ending June 30, 2008 (though there was a 6.5% loss on a market basis), as a result of gains during the prior years. This return was above the 8.00% assumed return, producing an actuarial gain that decreased Plan costs by 1.84% of active member payroll.

The above sources of actuarial gains and losses combined to decrease the Novato FPD employer contribution by 0.16% of payroll, as noted above.

The same factors expected to impact County and Special District costs are also expected to affect Novato's costs in the future:

- Future experience of the Plan will certainly differ from what we assume. As a result, actuarial gains or losses will occur annually, and the employer contribution rate will fluctuate. This is particularly true for Novato, as it has the smallest active population, and therefore is subject larger swings from changes in Plan membership.
- There are investment losses that are deferred by the actuarial smoothing method and not included in the actuarial value of assets used to determine the employer contribution rate. The ratio of the actuarial value of Plan assets to the market value is about 106%; that means that about 6% of Plan assets are losses that have yet to be recognized.

Investment losses experienced during 2009 will exacerbate this position, and begin to cause significant cost increases for a number of years.

 Based on the assumptions and cost method, Plan assets are currently below the target level of assets determined by the cost method; consequently, there is an unfunded actuarial accrued liability. As a result, the employer contribution consists of two components: The normal cost and the amortization of the unfunded actuarial accrued liability.

The employer normal cost of 22.78% of payroll represents the cost of the additional benefits earned each year by active Plan members. The balance of the employer contribution rate represents the amortization of the unfunded liability, which is a payment designed to bring the Plan's assets up to the target level set by the actuarial cost method.

As the unfunded actuarial accrued liability is amortized, the employer contribution rate will gradually decrease to a level near the normal cost of about 22.78% of payroll.

Summary of Results (City of San Rafael)

| | June 30, 2007 | June 30, 2008 | |
|------------------------------------|---------------|---------------|--|
| Plan Membership | | | |
| Active | 402 | 402 | |
| Inactive | 173 | 167 | |
| Receiving Benefits | 370 | 394 | |
| Total | 945 | 963 | |
| Average Pay | \$ 77,463 | \$ 81,600 | |
| Assets (\$ millions) | | | |
| Market Value | \$ 261.9 | \$ 247.9 | |
| Valuation Assets | \$ 235.8 | \$ 262.7 | |
| Valuation Results (\$ millions) | | | |
| Actuarial Accrued Liability | \$ 325.2 | \$ 360.3 | |
| Unfunded Accrued Liability | \$ 89.5 | \$ 97.6 | |
| Funding Ratio | 72.5% | 72.9% | |
| Employer Normal Cost Rate | 16.01% | 12.98% | |
| Amortization of Unfunded Liability | 25.17% | 26.02% | |
| Employer Contribution Rate | 41.18% | 39.00% | |

A summary of the current status of the San Rafael portion of the MCERA Plan is as follows:

Change in Plan Cost from June 30, 2007 to June 30, 2008

The employer contribution rate determined based on actual demographic and asset information has dropped by 2.18% of active member payroll. The actuarial assumptions and benefit provisions of the Plan remained unchanged from the prior valuation. The narrative and table below summarize the impact of actuarial experience and other changes on Plan cost.

• There were a number of changes made to the actuarial methodology and software.

These methodological revisions are the same as those described above for Marin County and Novato. For San Rafael, these changes resulted in a decrease of 0.64% in the employer contribution rate.

| | Employer Contribution Rate (% Payroll) |
|-----------------------------------------|----------------------------------------|
| June 30, 2007 | 41.18% |
| Change in Cost Due to: | |
| Change in Software / Methods | (0.64%) |
| Demographic Experience during 2007-2008 | 1.11% |
| Salary Experience during 2007-2008 | (0.55%) |
| New Entrants to the Plan | (0.90%) |
| Investment Experience during 2007-2008 | (1.20%) |
| Total Change | (2.18%) |
| Total Cost as of June 30, 2008 | 39.00% |

• Demographic experience caused an increase in the contribution rate.

Demographic experience includes rates of retirement, disability, termination, and death – as well as other factors, such as transfers, sick leave credit and COL assumptions. The demographic experience of the Plan was less positive than was assumed in the actuarial assumptions, producing actuarial losses and an increase in the employer contribution rate.

Losses were also present in the prior two year's valuations. The assumptions used to predict the behavior of the San Rafael members will be closely studied as part of the experience study to be completed in conjunction with this actuarial valuation.

• Pay increases were smaller than expected.

Increases in pay among active members during 2007-2008 were slightly below those anticipated by the actuarial assumptions. The impact of the lower than expected salary increases was small, reducing the employer contribution rate by 0.55% of payroll.

• New members entered the Plan.

Active participation in the Plan remained level from June 30, 2007 to June 30, 2008, but there were 34 new hires (or rehires) entering the Plan to replace departing members.

For San Rafael, the new hires have a lower Plan cost as a percentage of payroll than current members, but they increase the payroll on which contributions are based when they are hired. Therefore, due to the new hires, the employer contribution rate declined by 0.90% of payroll, but the addition of these new members will increase overall member payroll, thus increasing the Plan cost in dollar terms.

• Investment returns produced an actuarial gain.

The investment return on the actuarial value of all Plan assets – including reserves – was about 9.8% during the Plan year ending June 30, 2008 (though there was a 6.5% loss on a market basis), as a result of gains during the prior years. This return was above the 8.00% assumed return, producing an actuarial gain that decreased Plan costs by 1.20% of active member payroll.

The above sources of actuarial gains and losses combined to decrease the City of San Rafael employer contribution by 2.18% of payroll, as noted above.

The same factors expected to impact County and Special District costs are also expected to impact San Rafael's costs in the future:

- Future experience of the Plan will certainly differ from what we assume. As a result, actuarial gains or losses will occur annually, and the employer contribution rate will fluctuate.
- There are investment losses that are deferred by the actuarial smoothing method and not included in the actuarial value of assets used to determine the employer contribution rate. The ratio of the actuarial value of Plan assets to the market value is about 106%; that means that about 6% of Plan assets are losses that have yet to be recognized.

Investment losses experienced during the last half of 2008 and the first half of 2009 will exacerbate this position, and will begin to cause significant cost increases for a number of years.

 Based on the assumptions and cost method, Plan assets are currently below the target level of assets determined by the cost method; consequently, there is an unfunded actuarial accrued liability. As a result, the employer contribution consists of two components: The normal cost and the amortization of the unfunded actuarial accrued liability.

The employer normal cost of 12.98% of payroll represents the cost of the additional benefits earned each year by active Plan members. The balance of the employer contribution rate represents the amortization of the unfunded liability, which is a payment designed to bring the Plan's assets up to the target level set by the actuarial cost method.

As the unfunded actuarial accrued liability is amortized, the employer contribution rate will gradually decrease to a level near the normal cost of about 12.98% of payroll. However, this is a very long-term trend; there is currently a very substantial unfunded liability that will take many years to pay off before the cost will approach the normal cost. The unfunded liability is associated with prior actuarial losses (from various sources such as demographic experience, investments, etc.), as well as any improvements that have impacted benefits based on prior service.

Other Issues

There are a number of future policy decisions that the Board should consider.

Contingency and Other Reserves

The assets held in trust for the pension plan are allocated into various reserve accounts. The assets held in most of these reserve accounts are available as an offset to the liabilities of the Plan, and are therefore included in the valuation assets and used to reduce the employer's required contribution to the Plan. However, some reserve accounts are designated for a specific use other than offsetting the basic pension liabilities. For example, the assets held in the Health Insurance Reserve are designated to be used only for post-retirement healthcare benefits, and are therefore not available to offset the pension liabilities of the Plan, and are designated as non-valuation assets.

One type of reserve account – the Contingency Reserve (or those based on Excess Earnings) – receives special attention under the '37 Act. The Act specifies that each system should hold some of these "excess" earnings to act as "a reserve against deficiencies in interest earnings in other years, losses in investments, and other contingencies..." The Act specifies that these funds (if available) should represent at least one percent of the total assets, and most Plans exclude these amounts from valuation assets.

MCERA's past practice has differed from this approach. Although there are designated Contingency Reserves for each of the valuation groups, these assets (currently 3% of total assets for each of the County, Novato and San Rafael groups) have been included in the valuation assets, and thus have been used to offset the unfunded liabilities of the plan and thereby reduce the cost to the employers. However, the current level of the contingency reserves is a byproduct of how they are tracked in the financial statements – not an indication that significant Excess Earnings have actually been accumulated. The market losses experienced during FY 2008 (and continuing in FY 2009) would normally have reduced or eliminated any such contingency reserve under the accounting approaches used by most '37 Act systems.

We recommend that the Board should develop and adopt a new Excess Earnings policy which will govern the establishment and maintenance of future contingency reserves. We recommend that this policy be developed after the experience study and the "true-up" study of all of the reserves described in the prior actuarial valuation has been performed. It is not necessary for an Excess Earnings / Contingency Reserve policy to be implemented before the next valuation, since there would not be any such Earnings or Reserve due to the 2009 investment losses, but the policy should be developed before the possibility of future excess earnings arises.

Asset Allocation

MCERA relies on a complex procedure to estimate the allocation between the various agencies. It has been noted in prior valuation reports that this process adds significant time to the valuation process, as well as increasing the administrative burdens for the MCERA staff.

The current methodology involves first fully funding all current retiree liabilities, then projecting hypothetical asset balances for each Tier and Special District based on the contribution rates in effect for each agency, and finally adjusting for actual returns. The methodology is acceptable from a theoretical standpoint.

In the prior valuation, we suggested a study to look at instituting a new asset allocation policy. We still recommend that this study be performed. However, we recommend that the current policy be maintained for this valuation, as there were no significant events which occurred in the last year that would necessitate a change in policy. Also, the experience study currently being performed will have an impact on the estimation of the liabilities of the Plan, and thus could impact the distribution of assets under some or all of the methodologies under consideration. Therefore we recommend that a new asset allocation policy be considered after the acceptance of this Report, in conjunction with the experience study and reserve "true-up" analysis.

Actuarial Certification

In this study, we conducted an examination of all participant data for reasonableness and consistency. Actuarial funding is based on the Entry Age Normal Cost Method. Under this method, the employer contribution rate provides for current cost (normal cost) plus a level percentage of payroll to amortize the unfunded actuarial accrued liability (UAAL). As of the valuation date, the amortization period is either 16 or 18 years, depending on the individual Plan.

The funding objective of the Plan is to establish contribution rates that, over time, are likely to remain as a level percentage of payroll unless Plan benefit provisions are changed. For actuarial valuation purposes, Plan assets are valued at Actuarial Value. Under this method, the assets used to determine employer contribution rates take into account market value by spreading all investment gains and losses (returns above or below expected returns) over a period of five years.

Our firm has prepared all of the schedules presented in the actuarial report. We selected the actuarial assumptions shown in the schedules to be appropriate for use under the Plan. The assumptions used in the most recent valuation produce results that, in the aggregate, reasonably approximate the anticipated future experience of the Plan. We are currently performing an analysis of the Plan's noneconomic experience for the years 2006 through 2008 to confirm the validity of these assumptions.

We certify that the valuation was performed in accordance with generally accepted actuarial principles and practices. In particular, the assumptions and methods used for funding purposes meet the parameters of the Governmental Accounting Standards Board Statement No. 25.

Respectfully Submitted,

a Ur

Robert T. McCrory, FSA (206) 328-8628

Section 1:

Summary of Plan Provisions and Actuarial Assumptions

1.1: Brief Outline of Plan Provisions

Definitions

Compensation

Compensation means the cash remuneration for services paid by the employer. It includes base pay and certain differential, incentive, and special pay allowances defined by the Board of Retirement. Overtime is excluded, with the exception of overtime paid under the Fair Labor Standards Act that is regular and recurring.

Credited Service

In general, Credited Service is earned for the period during which Member Contributions are paid.

Temporary service for which the Member was not credited, or service for which the Member withdrew his or her Member Contributions, may be purchased by paying or repaying the Member Contributions with interest. The categories of services that credit may be purchased for are listed below:

- Leave Without Pay (Member's illness and education): Member may purchase only up to twelve months of service per incident.
- Re-deposits: Member may only purchase the amount of service previously withdrawn.
- Service Prior to Membership: Member must pay employee portion and applicable interest.
- Military Leave without Pay Leave: Member, who has taken a leave without pay in order to serve in the military, will be given a one-time option to buy the service time.
- Service In-Between: Member may purchase up to twelve months of service per incident.
- Public Service: Member must have been employed by the date as indicated below and cannot be receiving a benefit from the other entity:

April 16, 1979:

Novato Fire Protection District

May 1, 1979:

County of Marin Marin County Courts Marin City Community Service District Tamalpais Community Service District Southern Marin Fire Protection District Marin/Sonoma Mosquito and Vector Control District Local Agency Foundation Commission (LAFCO)

May 7, 1979:

City of San Rafael San Rafael Redevelopment

In all cases of service buybacks, repayment terms for most payment plans may not exceed the length of the period of service being purchased, with a maximum of five years. Payment for public service purchases may also not exceed five years. In the event of an active Member's death, the beneficiary is given the opportunity to pay off any service purchase agreements at the time of death.

A percentage of credited sick leave may be credited according to the Member's applicable bargaining unit.

Final Compensation

For County employees hired after June 30, 1980 and Local 535, Final Compensation means the highest Compensation earned during any thirty six consecutive months of the Member's employment. For all others, it is the highest Compensation earned during any twelve months of employment.

Miscellaneous Member

Any Member who is not a Safety Member is a Miscellaneous Member.

Safety Member

Any sworn Member engaged in law enforcement, probation, or fire suppression is a Safety Member.

Membership

Eligibility

All full-time, permanent employees of City of San Rafael, Novato Fire Protection Districts, Marin County and other participating special districts become Members on their date of appointment.

Service Retirement

Eligibility

Miscellaneous County Members hired after July 1, 2009 are eligible to retire at age 55 if they have earned ten years of Credited Service. All other Miscellaneous Members are eligible to retire at age 50 if they have earned ten years of Credited Service. Alternatively, Miscellaneous Members are eligible to retire at any age after having earned 30 years of Credited Service, or upon reaching age 70 with no service requirement.

Safety Members are eligible to retire at age 50 if they have earned ten years of Credited Service. Alternatively, Safety Members are eligible to retire at any age after having earned 20 years of Credited Service, or upon reaching age 70 with no service requirement.

Benefit Amount

The Service Retirement Benefit payable to the Member is equal to the Member's Final Compensation multiplied by credited service, the benefit factor from Table 1 and the age factor from Table 2 corresponding to the Member's code section. The age factor multiplied by the benefit factor for each code section is also shown in Table 2. The appropriate code sections for each group are listed in Table 1.

The percentage of Final Compensation may not exceed 100%.

Form of Benefit

The Service Retirement Benefit will be paid monthly beginning at retirement and for the life of the Member. If the member selects the unmodified benefit form, in the event of the Member's death 60% of the benefit will continue for the life of the Member's spouse or to the age of majority of dependent minor children if there is no spouse. In the event there is no surviving spouse or minor children, any unpaid remainder of the Member's accumulated contributions will be paid to the Member's designated beneficiary.

Actuarially equivalent optional benefit forms are also available.

Annually on April 1, benefits are increased to reflect increases in the CPI for the San Francisco Bay Area. Annual increases may not exceed the COLA figures shown in Table 1, but CPI increases above this figure are "banked" and used for future increases when the CPI increases by less than the figures shown.

In addition, ad hoc cost of living adjustments have been granted in the past and may be granted in the future.

A lump sum benefit of \$5,000 will be payable upon the death of a retired member.

Service-Connected Disability

Eligibility

Members are eligible for Service-Connected Disability Retirement benefits at any age if they are permanently disabled as a result of injuries or illness sustained in the line of duty.

Benefit Amount

The Service-Connected Disability Retirement Benefit payable to Members is equal to the greater of 50% of their Final Compensation or – if the Member is eligible at disability for a Service Retirement Benefit – the Service Retirement Benefit accrued on the date of disability.

Form of Benefit

The Service-Connected Disability Retirement Benefit will be paid monthly beginning at the effective date of disability retirement and for the life of the Member; in the event of the Member's death, 100% of the benefit will continue for the life of the Member's spouse or to the age of majority of dependent minor children if there is no spouse. In the event there is no surviving spouse or minor children, any unpaid remainder of the Member's accumulated contributions will be paid to the Member's designated beneficiary.

Actuarially equivalent optional benefit forms and COLA increases (as described for the Service Retirement benefit) are also available. A lump sum benefit of \$5,000 will be payable upon the death of the member.

Nonservice-Connected Disability

Eligibility

Members are eligible to for Nonservice-Connected Disability Retirement benefits if they are permanently disabled at any age after earning five years of Credited Service.

Benefit Amount

The Nonservice-Connected Disability Retirement Benefit payable to Miscellaneous Members is equal to the greatest of:

- 1.5% of Final Compensation at disability multiplied by years of Credited Service at disability;
- 1.5% of Final Compensation at disability multiplied by years of Credited Service projected to age 65, but not to exceed one-third of Final Compensation; or
- If the Member is eligible at disability for a Service Retirement Benefit, the Service Retirement Benefit accrued on the date of disability.

The Nonservice-Connected Disability Retirement Benefit payable to Safety Members is equal to the greatest of:

- 1.8% of Final Compensation at disability multiplied by years of Credited Service at disability;
- 1.8% of Final Compensation at disability multiplied by years of Credited Service projected to age 55, but not to exceed one-third of Final Compensation; or
- If the Member is eligible at disability for a Service Retirement Benefit, the Service Retirement Benefit accrued on the date of disability.

Form of Benefit

The Nonservice-Connected Disability Retirement Benefit will be paid monthly beginning at the effective date of disability retirement, and for the life of the Member; in the event of the Member's death, 60% of the benefit will continue for the life of the Member's spouse or to the age of majority of dependent minor children if there is no spouse. In the event there is no surviving spouse or minor children, any unpaid remainder of the Member's accumulated contributions will be paid to the Member's designated beneficiary.

Actuarially equivalent optional benefit forms and COLA increases (as described for the Service Retirement benefit) are also available. A lump sum benefit of \$5,000 will be payable upon the death of the member.

Pre-Retirement Death

Eligibility

A Member's survivors are eligible to receive different Death benefits dependent on the Member's cause of death and retirement eligibility.

Benefit Amount

In the event the Member's death resulted from injury or illness sustained in connection with the Member's duties, the Death Benefit payable to a surviving spouse or domestic partner will be 50% of the Member's Final Compensation.

In the event the Member was eligible for Service Retirement or Non-Service Connected Disability, the Death Benefit payable to the survivor will be 60% of the survivor benefit based on benefit due on Member's date of death.

In all other cases, the eligible survivor will receive a refund of the Member's contributions with interest plus one month of Final Compensation for each year of service to a maximum of six years.

Form of Benefit

The Service-Connected Death Benefit will be paid monthly beginning at the Member's death and for the life of the surviving spouse or to the age of majority of dependent minor children if there is no spouse.

COLA increases (as described for the Service Retirement benefit) are also available.

Withdrawal Benefit

Eligibility

A Member is eligible for a Withdrawal Benefit upon termination of employment.

Benefit Amount

The Withdrawal Benefit is a refund of the Member's accumulated Contributions with interest. Upon receipt of the Withdrawal Benefit the Member forfeits all Credited Service. Alternatively, the Member can leave contributions on deposit and retire at age 70.

Form of Benefit

The Withdrawal Benefit is paid in a lump sum upon election by the Member.

Deferred Vested Benefit

Eligibility

A Member is eligible for a Deferred Vested Benefit upon termination of employment after earning five years of Credited Service, including reciprocity service from another system. The Member must leave his or her Member Contributions with interest on deposit with the Plan.

Benefit Amount

The Deferred Vested Benefit is computed in the same manner as the Service Retirement Benefit, but it is based on Credited Service and Final Compensation on the date of termination.

Form of Benefit

The Deferred Vested Benefit will be paid monthly beginning at retirement and for the life of the Member; in the event of the Member's death, 60% of the benefit will continue for the life of the Member's spouse or to the age of majority of dependent minor children if there is no spouse. In the event there is no surviving spouse or minor children, any unpaid remainder of the Member's accumulated contributions will be paid to the Member's designated beneficiary.

Actuarially equivalent optional benefit forms and COLA increases (as described for the Service Retirement benefit) are also available. A lump sum benefit of \$5,000 will be payable upon the death of the member.

Reciprocal Benefit

Eligibility

A Member is eligible for a Reciprocal Benefit upon termination of employment and entry, within a specified period of time, into another retirement system recognized as a reciprocal system by the Plan. In addition, the Member must leave his or her Member Contributions with interest on deposit with the Plan.

Benefit Amount

The Reciprocal Benefit is computed in the same manner as the Service Retirement Benefit, but it is based on Credited Service on the date of termination and Final Compensation on the date of retirement; Final Compensation is based on the highest of the Compensation earned under this Plan or the reciprocal plan.

Form of Benefit

The Reciprocal Benefit will be paid monthly beginning at retirement and for the life of the Member; in the event of the Member's death, 60% of the benefit will continue for the life of the Member's spouse or to the age of majority of dependent minor children if there is no spouse. In the event there is no surviving spouse or minor children, any unpaid remainder of the Member's accumulated contributions will be paid to the Member's designated beneficiary.

Actuarially equivalent optional benefit forms and COLA increases (as described for the Service Retirement benefit) are also available.

A lump sum benefit may be payable upon the death of a retired Member by the last system the Member worked under.

Optional Benefit Forms

Prior to retirement, a member may elect to convert his retirement allowance into a benefit of equivalent actuarial value in accordance with one of the optional forms described below.

- 1. A reduced retirement allowance payable during his life with the provision that on his death the excess, if any, of his accumulated deductions at the time of retirement over the annuity payments made to him will be paid to his designated beneficiary or estate; or
- 2. A reduced retirement allowance payable during his life with the provision that after his death the reduced allowance will be continued for life to the beneficiary designated by him at the time of his retirement; or
- 3. A reduced retirement allowance payable during his life with the provision that after his death an allowance of one-half of his reduced allowance will be continued for life to the beneficiary designated by him at the time of his retirement.

Member Contributions

Each Member contributes a percentage of Compensation to the Plan through payroll deduction. The percentage contributed depends on the Member's age upon joining the Plan. Contribution rates are shown in the tables below. Members do not contribute after earning 30 years of Credited Service.

Interest is credited semiannually to each Member's accumulated contributions. The crediting rate is set by the Board; the current annual rate is 8.00% (annual) or 3.92% (semiannual).

1.2: Actuarial Methods and Assumptions

Actuarial Method

Annual contributions to the Marin County Employees' Retirement Association (the Plan) are computed under the Entry Age Normal Actuarial Cost Method.

Under this Cost Method, the Normal Cost is calculated as the amount necessary to fund Members' benefits as a level percentage of total payroll over their projected working lives. At each valuation date, the Actuarial Accrued Liability is equal to the difference between the liability for the Members' total projected benefit and the present value of future Normal Cost contributions.

The excess of the Actuarial Accrued Liability over Plan assets is the Unfunded Actuarial Accrued Liability, and the liability for each valuation group is amortized as a level percentage of payroll according to the amortization schedule for that entity.

| Group | Amortization Period | Period Type |
|------------------------------------------------|---------------------|-------------|
| Marin County | 18 years | Closed |
| Marin Courts | 18 years | Closed |
| Southern Marin Fire (Miscellaneous and Safety) | 18 years | Closed |
| LAFCO | 18 years | Closed |
| Marin City CSD | 18 years | Closed |
| Mosquito Abatement | 18 years | Closed |
| Tamalpais CSD | 18 years | Closed |
| City of San Rafael | 16 years | Open |
| Novato Fire Protection District | 16 years | Open |

The amortization periods for Marin City CSD, Mosquito Abatement and Tamalpais CSD were reset from 10 years to the current 18 year period for the current valuation.

Amounts may be added to or subtracted from the Unfunded Actuarial Accrued Liability due to Plan amendments, changes in actuarial assumptions, and actuarial gains and losses.

The total Plan cost is the sum of the Normal Cost and the amortization of the Unfunded Actuarial Accrued Liability.

Actuarial Value of Plan Assets

The actuarial value of Plan assets is modified market-related value. The market value of assets is adjusted to recognize, over a five-year period, differences between actual investment earnings and the assumed investment return. The actuarial value of assets is limited to no less than 80% and no more than 120% of the market value.

The detailed calculation of the actuarial value of Plan assets is shown in Section 2.2.

Actuarial Assumptions

The assumptions shown below are based on experience studies conducted as of June 30, 2006 by GRS for the period covering July 1, 2004 till June 30, 2006.

Summary of Actuarial Assumptions

| Valuation Date | All assets and liabilities are computed as of June 30, 2008. | | | |
|------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|--------|------|
| Rate of Return | The annual rate of return on all Plan assets is assumed to be 8.00%, net of investment and administrative expenses. | | |) be |
| Cost of Living | The cost of living as measured by the Consumer Price Index (CPI) will increase at the rate of 4.00% per year. | | dex | |
| Increases in Pay | Current Rate: 4.00% Base salary increases | | | |
| | Assumed pay increases for active Members consist of increases due to base salary adjustments (as noted above), plus service-based increases due to longevity and promotion, as shown below. No merit increases are assumed upon attainment of age 60. | | | |
| | Service | Miscellaneous | Safety | |

| Service | Miscellaneous | Safety |
|---------|---------------|--------|
| 0 | 3.00% | 8.00% |
| 1 | 2.25% | 3.00% |
| 2 | 1.50% | 1.50% |
| 3 | 0.75% | 1.00% |
| 4+ | 0.50% | 0.75% |
| | | |

Active Member Mortality

Rates of mortality for active Members are specified by the RP-2000 Combined Healthy Male and Female Mortality Basic tables published by the Society of Actuaries with ages set back three years for all members.

| Age | Male | Female |
|-----|-------|--------|
| 20 | 0.03% | 0.02% |
| 25 | 0.04% | 0.02% |
| 30 | 0.04% | 0.02% |
| 35 | 0.06% | 0.04% |
| 40 | 0.09% | 0.06% |
| 45 | 0.12% | 0.09% |
| 50 | 0.17% | 0.13% |
| 55 | 0.27% | 0.20% |
| 60 | 0.47% | 0.35% |
| 65 | 0.88% | 0.67% |

Retired Member Mortality

Rates of mortality for retired Members and their beneficiaries are given by the RP-2000 Combined Healthy Mortality Basic tables published by the Society of Actuaries with ages set back one year for male members and two years for female members.

| Age | Male | Female |
|-----|--------|--------|
| 45 | 0.14% | 0.09% |
| 50 | 0.20% | 0.14% |
| 55 | 0.32% | 0.22% |
| 60 | 0.59% | 0.39% |
| 65 | 1.13% | 0.76% |
| 70 | 1.98% | 1.34% |
| 75 | 3.39% | 2.30% |
| 80 | 5.79% | 3.76% |
| 85 | 9.98% | 6.25% |
| 90 | 16.64% | 10.73% |

Disabled Member Mortality

Rates of mortality among disabled Members are given by the RP-2000 Combined Healthy Mortality Table published by the Society of Actuaries with ages set forward three years for all members. Sample rates are as follows:

| Age | Rate |
|-----|-------|
| 45 | 0.19% |
| 50 | 0.29% |
| 55 | 0.53% |
| 60 | 1.00% |
| 65 | 1.79% |
| 70 | 3.04% |
| 75 | 5.21% |
| 80 | 8.97% |

Service Retirement

Retirement is assumed to occur among eligible members in accordance with the table below. Those members, whose accrued benefit is 100% of their final compensation, are assumed to retire immediately.

| Age | Miscellaneous | Safety 3% at 55 | Safety 3% at 50 |
|-----|---------------|--------------------|--------------------|
| 50 | 7.8% | 7.0% | 33.0% |
| 51 | 2.6% | 6.0% | 25.0% |
| 52 | 2.6% | 12.0% | 25.0% |
| 53 | 2.6% | 25.0% | 33.0% |
| 54 | 3.9% | 25.0% | 33.0% |
| 55 | 5.2% | 50.0% | 50.0% |
| 56 | 7.8% | 50.0% | 50.0% |
| 57 | 10.4% | 50.0% | 50.0% |
| 58 | 11.7% | 50.0% | 50.0% |
| 59 | 15.6% | 50.0% | 50.0% |
| 60 | 19.0% | 100.0% | 100.0% |
| 61 | 16.0% | 100.0% | 100.0% |
| 62 | 24.0% | 100.0% | 100.0% |
| 63 | 20.0% | 100.0% | 100.0% |
| 64 | 23.0% | 100.0% | 100.0% |
| 65 | 44.0% | 100.0% | 100.0% |
| 66 | 30.0% | 100.0% | 100.0% |
| 67 | 31.0% | 100.0% | 100.0% |
| 68 | 29.0% | 100.0% | 100.0% |
| 69 | 34.0% | 100.0% | 100.0% |
| 70 | 100.0% | 100.0% | 100.0% |

Service-Connected Disability

Separate rates of duty disability are assumed among Safety and Miscellaneous Members; rates for both sexes are combined. Below are sample rates:

| Age | Miscellaneous | Safety |
|-----|---------------|--------|
| 20 | 0.050% | 0.121% |
| 25 | 0.080% | 0.165% |
| 30 | 0.130% | 0.396% |
| 35 | 0.160% | 0.605% |
| 40 | 0.210% | 1.298% |
| 45 | 0.260% | 1.254% |
| 50 | 0.310% | 1.408% |
| 55 | 0.330% | 4.290% |
| 60 | 0.370% | 0.000% |
| 65 | 0.390% | 0.000% |

Non Service-Connected Disability

Separate rates of ordinary disability are assumed among Safety and Miscellaneous Members; rates for both sexes are combined. Below are sample rates:

| Age | Miscellaneous | Safety |
|-----|---------------|--------|
| 20 | 0.000% | 0.020% |
| 25 | 0.005% | 0.030% |
| 30 | 0.010% | 0.050% |
| 35 | 0.015% | 0.070% |
| 40 | 0.025% | 0.160% |
| 45 | 0.045% | 0.260% |
| 50 | 0.090% | 0.360% |
| 55 | 0.155% | 0.460% |
| 60 | 0.255% | 0.000% |
| 65 | 0.395% | 0.000% |

Withdrawal

Rates of withdrawal apply to active Members who terminate their employment and withdraw their member contributions, forfeiting entitlement to future Plan benefits.

Separate rates of withdrawal are assumed among Safety and Miscellaneous Members.

| Current Rates | less than five | years of service) |
|---------------|----------------|-------------------|
| | | |

| Service | Miscellaneous | Safety |
|---------|---------------|--------|
| 0 | 21% | 14% |
| 1 | 9% | 5% |
| 2 | 7% | 4% |
| 3 | 6% | 4% |
| 4 | 6% | 4% |

Current Rates (with at least five years of service)

| Age | Miscellaneous | Safety |
|-----|---------------|--------|
| 20 | 2.3% | 1.13% |
| 25 | 2.3% | 1.13% |
| 30 | 2.3% | 0.75% |
| 35 | 2.0% | 0.56% |
| 40 | 1.2% | 0.56% |
| 45 | 0.8% | 0.0% |
| 50 | 0.0% | 0.0% |
| 55 | 0.0% | 0.0% |

Vested Termination Rates of vested termination apply to active Members who terminate their employment after five years of service and leave their member contributions on deposit with the Plan. Alternatively, those who terminate their employment with less than five years of service can leave their member contributions with the Plan and transfer to a reciprocal employer, therefore retaining entitlement to future Plan benefits.

> Separate rates of withdrawal are assumed among Safety and Miscellaneous Members. The rates shown in the sample table below are applied after five Years of Service.

| Age | Miscellaneous | Safety |
|-----|---------------|--------|
| 20 | 3.00% | 2.06% |
| 25 | 3.00% | 2.24% |
| 30 | 3.00% | 3.53% |
| 35 | 2.50% | 3.41% |
| 40 | 2.00% | 1.14% |
| 45 | 1.70% | 1.70% |
| 50 | 1.40% | 0.27% |
| 55 | 0.80% | 0.00% |
| 60 | 0.80% | 0.00% |
| 65 | 0.00% | 0.00% |

Vested terminated Miscellaneous Members are assumed to begin receiving benefits at age 55; terminated Safety Members are assumed to begin receiving benefits at age 50. 40% of vested terminated members are assumed to be reciprocal.

| Accumulated Sick Time Load | Active members' accrued percentage, in accordance conversion to sick leave to retir | with the table | below, for |
|----------------------------|----------------------------------------------------------------------------------------|------------------------|------------|

Participant Data

Data on active and inactive Members and their beneficiaries as of the valuation date was supplied by the Plan Administrator on electronic media. As is usual in studies of this type, Member data was neither verified nor audited.

1.3: Glossary of Actuarial Terms

Actuarial Accrued Liability

A plan's actuarial accrued liability is the level of assets estimated by the system actuary to be needed as of the valuation date to

- Finance all previously earned benefits for actively employed members of the plan (and their beneficiaries, if applicable) for when they eventually retire, die or terminate with deferred vested benefits, and
- Finance all currently payable benefits of current pensioners and their beneficiaries (if applicable).

It is important to note that the Actuarial Accrued Liability is not a debt; instead, it is an asset target set by the actuarial cost method to produce an orderly accumulation of assets to pay for the plan's obligations.

Actuarial Assumptions

The actuarial assumptions are the actuary's anticipated rates of future termination, death, disability and retirement for each member of the plan as well as the actuary's anticipated rate of investment return on underlying assets. To the extent that these assumptions are not in exact accord with actual events (which they never are), actuarial gains and losses will materialize.

Actuarial Value of Assets

The actuarial value of assets, used for funding purposes, is computed using an asset smoothing technique in which investment gains and losses are not fully recognized in the year they occur, but are spread out. Use of an actuarial value of assets (rather than market value) helps avoid large fluctuations in recognized value of the underlying assets and, in turn, avoids large fluctuations in required contribution rates.

Actuarial Present Value of Benefits

The actuarial present value of benefits is the Actuarial Accrued Liability plus actuarial present value of future Normal Costs. The actuarial present value of benefits is also the actuarial present value of all future benefits expected to be paid to the Plan's current members, whether accrued on the valuation data or after.

Actuarial Funding Policy

The plan's actuarial funding policy is the scheduled program of accumulating assets to fund the plan's obligations, typically, but not necessarily, as a level percentage of payroll. The funding policy includes:

- The Normal Cost, and
- Amortization of the Unfunded or Overfunded Actuarial Accrued Liability (whichever is applicable).

Investment Gains and Losses

When the investment return on assets exceeds the assumed rate of return (the actuarial assumption as to investment return), this difference is identified as an investment gain. Correspondingly, when the returns are less than expected, this difference is identified as an investment loss. These investment gains and losses are either recognized immediately to produce the market value of assets or are spread out to produce the Actuarial Value of Assets.

Normal Cost

The Normal Cost is calculated as the amount necessary to fund each Member's benefits from that Member's Plan entry date to the end of his or her projected working life.

Unfunded Actuarial Accrued Liabilities

When the actuarial value of assets is below the Actuarial Accrued Liability, there is an Unfunded Actuarial Accrued Liability which must be paid off or amortized on a schedule. When the actuarial value of assets is in excess of the Actuarial Accrued Liability, this can lead to a reduction in future contributions on an amortization schedule.

Section 2:

Asset Information

2.1: Balance Sheet as of June 30, 2008 and 2007

| | June 30, 2008 | June 30, 2007 |

3.4: Comparison of Employer Contribution Rate by Agency

In the table below, the employer contribution rates determined under the 2007 and 2008 valuations are presented – exclusive of employer "pickups" - along with the number of active participants for each group. This should help put the high degree of volatility of cost associated with some of the smaller groups into proper context.

| Plan | Group | # of Actives | 2007 | 2008 |
|------------|----------------------------|--------------|--------|--------|
| County | County Misc Tier 1 | 88 | 30.42% | 11.67% |
| | County Misc Tier 2 | 116 | 17.11% | 10.29% |
| | County Misc Tier 3 | 1,499 | 14.05% | 14.33% |

Section 4:

Disclosure Information

4.1: Schedules of Funding Status and Employer Contributions Required Under GASB Statement No. 25

The Governmental Accounting Standards Board (GASB) Statements No. 25 and 27 relate to the disclosure of pension liabilities on a public employer's financial statements. For accounting periods beginning after June 15, 1996, information required under these statements must be prepared for a public employer who seeks compliance with generally accepted accounting principles (GAAP) on behalf of its public employee retirement system.

GASB Statement No. 25 requires preparation of schedules of funding status and employer contributions, as well as the disclosure of plan provisions, actuarial assumptions, and other information. The required schedules are shown below. In each case, we have relied upon information from our files and contained in the reports of other actuaries employed by the employer in completing the schedules. While we have no reason to believe the information in our files or in other actuaries' reports is inaccurate, we strongly recommend that employer personnel verify the schedules below before they are included in Plan or employer financial statements.

| | Schedule of Funding Status (Dollar Amounts in Thousands) | | | | | | |

4.2: GASB Schedules - County of Marin

| Schedule of Employer Contributions (Dollar Amounts in Thousands) | | | | | |
|---------------------------------------------------------------------|---------------------------------|---------------------|------------------------|--|--|
| Year Ending | Annual Required Contribution | Actual Contribution | Percentage Contributed | | |
| 6/30/1999 | 13,714 | 13,714 | 100% | | |
| 6/30/2000 | 15,768 | 15,768 | 100% | | |
| 6/30/2001 | 15,576 | 15,576 | 100% | | |
| 6/30/2002 | 18,723 | 18,723 | 100% | | |
| 6/30/2003 | 21,632 | 21,632 | 100% | | |
| 6/30/2004 | 21,254 | 21,254 | 100% | | |
| 6/30/2005 | 22,085 | 22,085 | 100% | | |
| 6/30/2006 | 36,870 | 36,870 | 100% | | |
| 6/30/2007 | 42,416 | 42,416 | 100% | | |
| 6/30/2008 | 39,656 | 39,656 | 100% | | |

² The funded status as of 6/30/2007 was initially computed using projected demographic data from 6/30/2006 and asset information as of 6/30/2007. The funded status was later recomputed using updated demographic information as of 6/30/2007. The Annual Required Contribution for the FYE 6/30/2009 (to be shown in future valuation reports) is based on the initial projected results.

³ As recomputed using demographic information as of 6/30/2007.

 $^{^{6}}$ The funded status as of 6/30/2007 was initially computed using projected demographic data from 6/30/2006 and asset information as of 6/30/2007. The funded status was later recomputed using updated demographic information as of 6/30/2007. The Annual Required Contribution for the FYE 6/30/2009 (to be shown in future valuation reports) is based on the initial projected results.

⁷ As recomputed using demographic information as of 6/30/2007.

The table below summarizes certain information about this actuarial report.

| Valuation date | June 30, 2008 | | | | | |
|-------------------------------|--------------------------------------------------------------------------------------------------|--|--|--|--|--|
| Actuarial cost method | Entry Age Normal | | | | | |
| Amortization method | Level percentage of payroll (open/closed varies by Agency) | | | | | |
| Remaining amortization period | 16 - 18 Years (varies by Agency) | | | | | |
| Asset valuation method | Actuarial value: Excess earnings smoothed over five years, 80%/120% corridor around market value | | | | | |
| Actuarial assumptions: | | | | | | |
| Investment rate of return* | 8.00% | | | | | |
| Projected salary increases* | 4.00%, plus service-based rates | | | | | |
| *Includes inflation at | 4.00% | | | | | |
| Cost of living adjustments | 100% of CPI up to 2/3/4% annually with banking | | | | | |
